Coronavirus, obviously we aren't being told everything. Distance and quarantine for 2 weeks, 30 day guidelines, yet speeches talk about MONTHS.
The introduction of DNA into a virus makes it "sticky". Meaning parts will stay even after being"cured". Like planting seeds.

I wonder what this virus leaves Behind AFTER it's "cured?" 🤔🤔

People are tracking it, adding up the pieces, and the sum doesn't look good. But maybe they knew it could be tracked? Maybe they didn't care because by then it would be too late? "Inferno?"

Many people will probably contract and spread this virus without ever knowing it, that would certainly explain the over the top programs in place right now, States shut down, etc., Especially for such a small overall mortality rate.

The unknown "spread" may be just what they are hoping for. Maybe they want most of the world's population to carry this virus and "be implanted by their seed?"
That would be quite a "mark", wouldn't it?

Let's say those seeds left behind could be "activated" whenever they choose, against any group they want. How would those seeds be activated inside someone? Causing death, limiting health or mental ability, or just crippling people for profit and control.

carry out their goals. It's a good thing 5G doesn't exist.

This one didn't get through.
The introduction of HIV suppresses and "fools" the immune system. Like throwing the door to your body wide open. Allowing things to planted deep.

TheDS has let their overall plans slip. Escalate the virus as much as possible. Even helping it spread, explains why certain nursing homes/states seem to be affected more than others. With holding medication/supplies to ensure it does. (Reminds me of the old angel of death cases)

Release prisoners, this saves them money on care/housing. And causes crime to rise, giving them another excuse to crack down and grab power. Probably learned it fr Castro cleaning out his jails.

Homeless groups in cities across this country number well over 50. Some in the 100's. Balt., L.A., San FransickO, NY. Funny how it's spreading thru that population so quickly but nothing is being done or reported, only when there is a body to deal with. Seems certain politicians

have found a answer to their city/state homeless problem 🤔 In Baltimore we are organizing mobile first aid/health checks for these groups, as well as elderly, shut ins, shelters, disadvantaged children. We are trying to provide care, test

About 3 years ago, in Baltimore, I made a video tape approximately 3hours long. It was made for the express purpose of being delivered to Devin Nunez. Initially a redacted copy was delivered, later a full version was delivered. On this tape I discuss in detail my background

my work with the DOJ in Baltimore, as well as other federal agencies, and I went into GREAT detail about the crimes committed by those people I worked with. Including illegal surveillance, on private citizens, political rivals, business

#coronavirus Coronavirus I am the manager of a GP practice in Barnet. Although the picture is changing everyday we are advising patients with symptoms consistent with the virus like a new persistent cough and or a fever to stay at home and self isolate for seven days.

If your condition worsens or you feel like you need advice go to the NHS website 111.nhs.uk/covid-19 Or call 111. But they are overwhelmed at the moment and I'm hearing call back times up to twelve hours.
